

Graphene in PRL

Physical Review Letters

Samindranath Mitra

Though the focus of related research has been changing, each year both PRL and Phys. Rev. continue to receive hundreds of papers on graphene-based topics. PRL's acceptance rate for papers in all areas of physics has dropped in recent months. In this context I will present some information and data regarding what the journal receives, publishes, and intends to publish in the areas of graphene and related 2D materials.
